39th Annual Convention | October 6, 2026

FEEDING THE FUTURE

Building a Stronger Philippine Livestock and Poultry Industry

Atty. Kenneth G. Cheng
CEO, Bounty Fresh Group Holdings Inc. and President of the Fresh Group

Food Security Starts Long Before Food Reaches the Table

Chicken Is Becoming More Important To The Filipino Table

19 KG

Chicken consumption per capita

Chicken is an increasingly important source of protein for Filipino families.

2.18M MT

2025 Philippine market

1.63M MT local + 554K MT imported

A large and resilient market, supported by both local production and imports.

+200K MT

Projected additional demand over the next 5 years

The Philippine chicken market is expected to grow by around 200,000 metric tons in the next five years.

The Challenge Is Not Simply to Produce More.

We have to produce BETTER.

Three Eras of the Industry

ERA 1

PRODUCTION

Can we produce enough?

Meeting the country's growing demand for affordable food.

ERA 2

INTEGRATION

Can we produce better?

Building an integrated value chain to improve quality, efficiency, and reliability.

ERA 3

VALUE

How do we create greater value?

Creating meaningful value for consumers, partners, farmers, and society—today and for generations to come.

Integration Is More Than Ownership

It is making the whole system work better.

What Integration Delivers

BIOSECURITY

Strong biosecurity across every stage to protect our flocks, people, and products.

CONSISTENCY

Standardized processes and best practices deliver consistent results, every time.

QUALITY

High-quality products that meet the highest standards of safety, nutrition, and taste.

RELIABILITY

A dependable supply chain you can count on—rain or shine, day after day.

TRACEABILITY

End-to-end visibility ensures transparency and accountability from farm to fork.

NATIONWIDE SUPPLY

A nationwide network that brings better food to more Filipino families, every day.

The Next Era is about Creating Value

Getting more from every part of the system

Creating More Value from the Same Chicken

More understanding of the consumer = more value created

Value is Created Across the Entire System

Nutrition is at the Center of the System

Feed is an input. Nutrition is a capability.

The Role of the Nutritionist is Changing

FROM

Formulating Feed

TO

Creating Value Across the System

From Feed Formulator to Value Creator

SCIENCE

Better nutrition.

ECONOMICS

Better efficiency.

TECHNOLOGY

Better decisions.

SUSTAINABILITY

Better use of resources.

Food Security Pillars

1 Availability of Supply

2 Accessibility or affordability

3 Utilization or nutritional benefit

4 Stability or Consistency

How To Balance Between Imported and Locally Produced Chickens?

1. Use Special Safeguard (SSG) duties more strategically.

2. Strict market Segmentation.

3. Addressing Cost Disadvantage.

4. Leveraging Biosecurity as a Competitive Advantage.
